

Sustainability Report

Our responsibility

“We recognise the important role we can play to support our customers and clients on their sustainability journeys, including the transition to a low carbon economy.”

Adrian Sainsbury, Group Chief Executive

Our purpose is to help the people and businesses of Britain thrive over the long term, and we are here to support them on that journey. Our strategy to achieve this purpose is built on our responsibility, being to help address the social, economic and environmental challenges facing our business, our people, customers and clients, now and into the future.

In this Sustainability Report we have set out our approach as well as progress across all elements of our sustainability strategy. We will play our part in supporting our people, customers and clients to achieve their best outcomes now and in the future. We see responsibility as a core part of our business and central to our success. It encourages us to look at how we operate our business, as we focus on achieving the best outcomes for our stakeholders whilst making a positive impact on society and the environment.

We are committed to achieving net zero across our operations, our supply chain and the activities we finance by 2050 or sooner. In September 2022 we joined the NZBA and this year we developed our first sector-based intermediate 2030 emissions reduction pathways for cars and vans, the largest carbon-intensive sectors in our loan book.

Our Asset Management division has recently set out its sustainability strategy in its inaugural TCFD-aligned entity report – supporting its commitment to align its operations and investments to a more sustainable future. Earlier in the financial year, the division announced its initial percentage of AuM to be managed in line with net zero, following its commitment to the Net Zero Asset Managers initiative.

A key enabler for our overall business success is our inclusive culture. We are proud to create an environment where colleagues can thrive and, in turn, deliver excellent outcomes for customers. We invest in and promote a range of diversity and inclusion initiatives. We have recently set out our Group Diversity and Inclusion Strategy from FY 2024 to 2027.

Central to all decision-making is doing the right thing for customers, clients and partners, by helping them access financial solutions to meet their needs across all market conditions. We engage with our customers throughout their end-to-end journey and actively seek their feedback.

Our Sustainability Objectives

Supporting our customers, clients and partners in the transition towards more sustainable practices

Promoting an inclusive culture in everything we do

Reducing our impact on the environment and responding to the threats and opportunities of climate change

Promoting financial inclusion, helping borrowers that might be overlooked by larger finance providers and enabling savers and investors to access financial markets and advice to plan for their future

Read our March 2024 Net Zero Update report.

Read our Asset Management division's inaugural TCFD-aligned entity report.

What sustainability means at Close Brothers

At Close Brothers, we are here to help the people and businesses of Britain thrive over the long term, working together to embrace change and capitalise on the opportunities it presents. This means supporting our colleagues, customers and clients, and the communities and environment in which we operate.

- E Environmental
- S Social
- G Governance

Our car fleet E

Our car fleet is now

53.6%

battery electric with average stated emissions now down to 19.1 gCO₂/km.

Our emissions E

Scope 1 and 2 emissions (market-based)

41.6%

reduction since 2019 (2023: 46.0%).

51.1%

renewable energy as a proportion of our energy use across our offices and Brewery Rentals business (2023: 50.0%).

Our green lending E

£1 billion

lending ambition for zero emissions battery electric vehicles over the five years to FY 2027.

2024: £152.4m

lending for zero emissions battery electric vehicles achieved in this financial year and a total of £316.4m in the first two years of the five-year ambition period.

Our communities S

386

employees used their volunteering day (2023: 200).

Our social mobility S

Last summer, we welcomed 35 students to complete six-week internships with us. 28 students joined us through the 10,000 Interns Foundation and seven university students from lower socioeconomic backgrounds joined us through our partnership with upReach.

Our investments E

67.8%

of companies within our equities and corporate bonds investment portfolio align with the goal of limiting temperature increases to below 2°C.

41.5%

of companies within our equities and corporate bonds investment portfolio align with the goal of limiting temperature increases to below 1.5°C.

Our inclusivity S G

90%

of our colleagues feel included (2023: 96%).

Our alliances G

As a signatory to the NZBA, we commit to transition our lending and investment portfolios to align with net zero pathways by 2050. We work closely with the Partnership for Carbon Accounting Financials and its local members in developing accounting principles for financial carbon emissions.

Task Force on Climate-related Financial Disclosures Report

We present our third Task Force on Climate-related Financial Disclosures (“TCFD”) report. Our disclosures comply with the FCA’s Listing Rule 9.8.6R (8) and are consistent with the 2017 Recommendations of the Task Force on Climate-related Financial Disclosures. We have also considered the additional 2021 Annexes where practical to do so.

TCFD recommendations	Our progress	Future focus
 <h3>Sustainability and Climate Governance</h3> <p>Describe the board’s oversight of climate-related risks and opportunities.</p> <p>Describe management’s role in assessing and managing climate-related risks and opportunities.</p> <p>➤ See pages 46 to 47</p>	<ul style="list-style-type: none"> • Board monitoring of climate-related risks and opportunities enabled through clear roles and responsibilities for the board and board committees. • Ongoing ESG and climate-specific training delivered to board and all group employees. • Group chief risk officer accountable under the Senior Managers and Certification Regime for identifying and managing the financial risks associated with climate change. • Continuous review of climate risk governance framework to ensure that ongoing embedding of climate risk within our risk management framework is fully encompassed. Climate risk actively embedded within management decision-making. 	<ul style="list-style-type: none"> • Board to oversee the ongoing development of transition pathway. • Continue to build climate knowledge at board and senior management level. • Enhance data provision by decentralising to each business, maximising data provision, modelling and integration into decision-making. • Advance climate skills and competencies across our staff and stakeholders – with specific focus on the rapid evolution in technologies and deployment in the UK market.

 <p>Metrics and Targets</p> <p>Disclose the metrics used by the organisation to assess climate-related risks and opportunities in line with its strategy and risk management process.</p> <p>Disclose Scope 1 and 2 and, if appropriate, Scope 3 greenhouse gas emissions and the related risks.</p> <p>Describe the targets used by the organisation to manage climate-related risks and opportunities and performance against targets.</p> <p>➤ See pages 42 to 45</p>	<ul style="list-style-type: none"> • Broadening of our climate strategy and targets to cover both net zero and Scope 1 and 2 operational targets, as well as specific targets relating to our financed emissions. • Enhanced capabilities to measure the carbon footprint for our operations, including measurement across Scope 3 operational emission categories. • Further enhanced assessment of Scope 3 financed emissions (primarily our loan book) using evolving Partnership for Carbon Accounting Financials (“PCAF”) methodologies. • Developing transition plans as part of our commitment to net zero through the NZBA. • Continued collaboration with industry body forums including active engagement in PCAF specialist working groups. • Published our first sector-based intermediate 2030 emissions reduction pathways for cars and vans representing some of our largest carbon-intensive sectors of our loan book. • Received a ‘B’ management rating from CDP, a ‘AA’ ESG rating from MSCI, and a 22.8 ESG risk score from Sustainalytics. 	<ul style="list-style-type: none"> • Build on our current operational emissions targets to cover our wider Scope 3 operational emissions. • Improved customer climate data capabilities across our portfolios to improve accuracy of financed emissions reporting, risk assessment and business strategy. • Progress further targets across our lending and investment activities to support our transition pathway.

Climate strategy

As a group supporting many sectors of the UK economy through our lending products and investment services, we understand our role in helping to enable the transition to a low carbon future.

We are committed to working with all of our stakeholder groups to meet the goals of the Paris Agreement. In 2022, we became a signatory to NZBA, committing to transition all operational and attributable greenhouse gas (“GHG”) emissions from our lending and investment portfolios to align with pathways to net zero by 2050 or sooner.

We provide expert financing solutions for UK SMEs, and will need to align our lending with the transition pathways of our customers. As businesses in the UK develop and deliver their own transition plans to adopt clean technologies, greener assets and new business models, we are ready to support them by providing appropriate financing solutions; in doing so, facilitating change and supporting the wider transition of the economy.

Across the organisation we recognise the importance of addressing the threat of climate change, and the urgency needed in tackling the environmental, economic and social impacts that it brings, noting that these extend across all sections of society, affecting all key stakeholder groups.

Our ongoing work to identify the risks and opportunities of climate change to our business model remains a key area of strategic focus for the board and senior management.

The Three Pillars of our Climate Strategy

1. Achieving net zero operations

Achieving net zero emissions and reducing supply chain emissions, working with our partners and suppliers to minimise operational impacts.

Addressing the impact our own emissions have on the environment remains a key focus for us, demonstrating our commitment to our wider net zero ambition.

We have previously set ourselves challenging net zero aligned targets for our buildings and fleet – becoming operationally net zero through our Scope 1 and 2 emissions by 2030, and we have continued this year in developing our plans across our buildings to meet these.

Further to meeting all of the mandatory reporting requirements under the Streamlined Energy and Carbon Reporting (“SECR”) standards, we provide enhanced disclosure across our wider operational impacts. As set out in our emissions reporting on page 43, we have assessed our full operational footprint, covering Scope 1 and 2 as well as all relevant Scope 3 categories.

We continue to advance our monitoring and calculation of these operational impacts – improving the data quality and availability. For example, this year, we have sourced reported Scope 1 and 2 emissions for 27% of our supplier spend to improve the quality of our Scope 3 category 1 disclosures.

We are seeing the benefits of supply chain engagement on climate action both through our own engagement with our largest suppliers as well as engagement with some of our own business customers, where we represent a proportion of their supply chain emissions.

Our workplace team continue to work closely with our facilities management contractor to progress our net zero strategy for all of our properties (covering offices as well as our industrial sites operated by our brewery keg rental business). This has culminated in the team finalising our net zero strategy to 2030 for our estate and to develop a business case and investment options for the group to cover energy efficiency, heating electrification and renewable energy investments through this decade.

Our drive towards having a net zero emission car fleet has continued this year though the pace of change has slowed a little due to market dynamics in the UK's electric car market. With a recognised leading strategy of adopting battery electric vehicles ("BEVs") onto our fleet, this year we have passed the 50% mark and, at July 2024, our car fleet is 53.6% fully electric vehicles.

Our efforts to transition our car fleet have driven our fleet average emissions down further this year. The average CO₂ emissions for our car fleet is now 19.1 gCO₂/km (2023: 23.5 gCO₂/km).

Our car fleet

2. Reducing our financed emissions

Supporting the goals of the Paris Agreement through re-alignment of our financing and by assisting our customers in meeting their transitional targets.

Understanding the climate impacts across all of our lending and investments, alongside developing new green growth opportunities in our current and future markets, are crucial steps in us developing our climate transition plan and aligning our financing to our net zero commitments.

This year, we have continued to develop our climate assessment of the assets and businesses in our lending and investment activities. A summary of our assessed Scope 3 financed emissions is set out on pages 44 to 45.

As members of PCAF, we work closely with other peer banks to develop best practice data sourcing and carbon accounting for our range of financing activities – improving our understanding of the impacts of these assets and businesses and supporting our ongoing development of our climate strategy.

In 2022 we became a signatory to NZBA. We committed to develop sector-based intermediate 2030 emissions reduction pathways for the most carbon-intensive sectors in our loan book. In March this year, we set out our initial sector ambition covering road transport, specifically cars and light commercial vehicles/vans ("LCVs"). In the coming financial year, we will continue to expand our assessment across other carbon-intensive sectors in our loan book with likely next priorities in the power generation and construction sectors.

During FY 2024, our Asset Management division has continued to develop its climate strategy. In June, it published its inaugural TCFD-aligned entity report as well as TCFD-aligned reports for each of its funds. Through its sustainability strategy, raising awareness, holistic decision-making and continual sustainability assessment, it is progressing towards embedding ESG principles across all of its operations, reflecting a commitment to long-term development in sustainability.

3. Financing the transition

Enabling the deployment of cleaner technologies and business model adaptation through our green growth lending strategy, leveraging our expertise and ensuring alignment with agreed risk appetite.

We recognise the significant growth opportunities for green asset lending across several of our existing asset classes, as well as new ones. As a specialist, adaptable lender, with deep understanding of our customers' needs, we can support our clients in their transition to new, cleaner technologies to meet their own sustainability targets.

One of our largest lending sectors is road transport and we are already seeing deployment of BEVs by our fleet customers in both passenger and goods vehicles, as they seek to reduce their costs, carbon emissions and local air pollution.

In 2022, we set ourselves our first green growth ambition, which was to provide funding for at least £1.0 billion of BEVs in the five years from 2023 to 2027. In the first two years, we have funded £316.4 million for BEVs, putting us close to target to meet this ambition.

Risk management

How we Identify, Assess and Manage Climate-related Risks

Our group Enterprise Risk Management Framework, as outlined on page 74 of the Risk Report, facilitates a consistent application of all features of the group's risk management approach to the risks associated with climate change. This extends to both the physical risks, which are considered a cross-cutting risk impacting across our suite of principal risks, as well as transitional risks, which are additionally measured and monitored in line with our emerging risks.

Description		Timeline	Potential impacts
Physical Climate Impacts			
Extreme weather events (including persistent heat and severe flooding events) as well as long-term shifts in climatic conditions. Increased frequency and magnitude of weather events.	Physical damage to customers' assets. Disruption to sector productivity (such as labour impacts in our construction sector customers, crop yields in our agriculture customer base).	Medium to long term	Credit risk – counterparty and collateral.
	Disruption or damage to our own properties or those of our suppliers/ partners (such as data centres and call centres).	Long term	Supply chain risk. Business continuity impacts and disruption to customers.
Transitional Climate Impacts			
Changing markets through the transition to a low carbon economy – driven by new regulation, policy, technologies and customer appetites.	Significant shift in a sector's technology – such as the current impacts on some of our existing transport activities.	Medium to long term	Credit risk – counterparty and collateral. Uncertainty around new and legacy asset values.
	Uncertainty and change in many sectors in the UK where our SME customer base operates. Changing demands and expectations from their customers. A growing focus on energy efficiency and environmental performance.	Medium to long term	Credit risk – counterparty and collateral. Uncertainty in markets could lead to reduced investment activity by customers in the short term.
	Changing operating models for customers and higher capital investments in clean assets – such as growing opportunity for businesses to adopt onsite renewable generation, energy storage and electric vehicle charging assets. Leading to the need for new products and underwriting approaches.	Medium term	New business models. Need for new skills and capabilities across the bank.
Changing stakeholder climate expectations.	Our stakeholders (including our investors, customers, staff) scrutinising our climate transition plan and delivery against targets. Evolving market appetites towards lending to high carbon sectors (including fossil fuel extraction, carbon intensive transport).	Medium to long term	Reputational risk – ability to attract or retain talent. Impact on attractiveness to investors and savers.

Alignment of Group-wide Framework with Climate-related Risks and Opportunities

The alignment of our risk management framework with climate-related risks and opportunities remains a priority as we continue to develop ongoing risk assessment and monitoring of our banking book and impacts across other principal risks. Continual enhancement of standards and policies supports the increasing maturity of climate risk within our end-to-end risk processes.

We recognise that this is a multi-year journey with the impacts of physical and transitional risks, and supporting frameworks to assess these, still evolving across the industry. The impact of climate change across time horizons and our proportional response will continue to be considered within our wider risk assessment, financial planning and strategy development.

Our business planning time horizons

Short term (0-1 year)	Time horizon for annual budgeting and capital assessment.
Medium term (1-3 years)	Time horizon for business strategy and financial planning. Also aligns with typical ICAAP scenario analysis horizon.
Long term (more than 3 years)	Time horizon beyond typical financial planning cycle. Impacts primarily assessed through the use of long-term scenario analysis noting most material climate risks will crystallise in this horizon.

Risk culture and awareness

A risk culture with strong foundations runs throughout the group, consistent with the group's purpose, strategy, cultural attributes and values. The management of climate risk and opportunities is enveloped within this.

Specialist role-specific training on climate change impacts is undertaken and all colleagues are offered training and webinars to ensure they are kept abreast of regulatory developments, expectations of corporate responsibility and wider market sentiment.

Internal controls

To support ongoing embedding of climate risk in our control environment, in-year enhancements have focused on continuing to reinforce climate risk within our policy documentation and on ensuring that internal process is complemented by the activities of our key suppliers and partners.

Governance

A key component of embedding climate risk into our group-wide framework is a coherent three lines of defence model. As our climate risk framework continues to mature, it has afforded additional opportunities to further refine our governance structure to manage an integrated approach to both climate risks and opportunities and to ensure that recent enhancements are fully encompassed. The structure currently in place is on page 46.

Stress testing

Furthering our previous work on long horizon scenario analysis, recent activities recognise the short tenor of our loan book (15 months), and accordingly our focus is on further integrating climate exercises into wider group stress testing exercises, e.g. Internal Capital Adequacy Assessment Process ("ICAAP") and resilience scenarios. Specific concentration focus is being placed on transport and energy sectors.

Risk appetite

Consideration of climate risk is integrated into the group's risk appetite statements, which align risk management with group strategy. While quantitative measures are, in the main, currently included for monitoring purposes, we are continuing to develop more tailored, formal risk appetites, particularly for credit risk where measurement of quantifiable metrics against limits specific to business considerations is more readily achievable. We expect these to be based on sectoral transition risk assessments, aligned to our ambition to meet the goal of the Paris Agreement to reach net zero by 2050.

Addressing Data and Future Enhancements

Data quality remains a key challenge and we are committed to developing enriched climate risk data that will support more accurate measurement and monitoring. In turn, this will support effective risk mitigation and strategic alignment.

Making progress in our climate and broader sustainability reporting and management information capabilities will facilitate more decision-useful insights, supporting the evolution of the group's strategy for managing risks and opportunities and the development of more tailored risk appetites.

Climate Cross-cutting Risks

Impacts arising from the physical nature of climate change have the potential to affect several of our existing principal risks.

Noting the longer time horizons for some transitional climate impacts to crystallise (such as on policy and regulation) we track climate risk as one of our core emerging risks.

➤ See page 84

Climate-related data (enhancement in progress)

A Cross-cutting Risk Impacting Across Multiple Principal Risks

In assessing both the risks and opportunities of climate impacts and in preparing our TCFD disclosures, we have sought to provide sufficient granularity, proportionate to the materiality of the climate-related risks identified across the group. An extensive analysis of risks has been completed across our risk universe which indicates we are not materially exposed to loss or disruption over the short to medium term. Over the long term, increased risk has been identified, primarily driven by potential transitional impacts. In respect of physical risk, we consider severe impacts are only likely to present in the long term, albeit we recognise acute physical events are already happening. Risks identified are largely mitigated through our resilient business model, benefiting from an average tenor of 15 months, and a customer base that is predominantly in the UK and Republic of Ireland, with strategic management actions to support our customers and strategic partners on their own transition pathways.

Our focus remains primarily centred on credit and operational risk impacts consistent with our view that these represent greatest potential impact. We acknowledge that developments which may have a transitional impact over the medium to longer term could carry additional exposure should appropriate, timely management actions not be taken to maintain the resilience of our business operating model. For more details of our management of emerging risks please see page 84 of the Risk Report.

We anticipate incremental enhancements to assessment, monitoring and reporting to support a greater quantitative lens, augmenting the qualitative assessment already established.

Credit risk

The focus remains largely on credit risk, given its materiality to the Banking division and wider group, and importantly its sensitivity to potential climate impacts, noting that both physical and transitional drivers have the potential to impact both counterparty and collateral risk.

Our current methodology deployed across £9.0 billion (88%) of the Banking division loan book continues to identify exposures deemed to have the most sensitivity to climate change, noting it does not account for time horizons over which climate impacts are expected to crystallise. It does, however, prove useful in identifying those exposures deemed as having the most potential sensitivity to climate change, including energy-consuming assets such as motor vehicles in our Motor Finance and Asset Finance businesses, non-renewable energy generation assets, and general business lending in high-impact sectors.

Sensitivity dashboards continue to be presented at regular risk committees, ensuring engagement in the climate risk agenda occurs vertically throughout the organisation. For an overview of risk committees see pages 76-77.

Operational risk

Recognising the potential for climate change to impact buildings and service provision capabilities, the group has conducted a review of its existing business continuity plans as well as its broader approach to crisis management to ensure potential impacts on our people, customers and infrastructure have been assessed and that the group is adequately prepared.

Relevant operational risk standards consider the causal impacts presented by climate change, while work continues to incorporate climate impact considerations within our assessment of operational resilience for critical services and change management risk assessments.

The group also recognises the potential for key third parties and suppliers to be impacted by climate change (due either to physical or transitional factors), causing disruption to day-to-day business operations. To maintain pace with the evolving regulatory landscape, the group's third-party management framework has been strengthened to include enhanced supplier due diligence questionnaires to gather climate and ESG data for all of our Tier 1 and Tier 2 suppliers, while our tendering process has been updated to consider environmental and climate considerations alongside sustainability innovation and performance. Our suppliers are increasingly focused on reducing carbon emissions, aiming for at least 50% reductions by 2030 as well as supporting a low-carbon global economy.

Other risks

Work to integrate consideration of climate risk across other identified risk areas continues to progress in line with climate change, and the group's response to it, forming an integral part of our business strategy. This includes continued assessment of the resilience of our model, to ensure we are sufficiently prepared to manage the risks posed by it. As outlined in the Governance section (pages 46-47) strong oversight of strategic delivery is maintained through our committee framework, with consideration of climate risks now embedded within our strategic planning.

The rapidly evolving regulatory landscape also presents risk and we recognise our responsibility to comply with new and emerging requirements. Horizon scanning capabilities have been enhanced in response, to ensure new requirements are identified and assigned to the relevant functions.

Climate impacts are considered part of our overall commitment and conduct responsibilities to deliver good customer outcomes.

Funding and liquidity impacts are subject to ongoing reassessment with regular updates provided to relevant Treasury committees. Primary focus areas include implications for debt capital markets, potential behavioural changes in our investor base, and possible direct and indirect reputational impacts, including those related to evolving disclosure requirements.

We continue to assess traded market risk implications for Winterflood, although the role of the business as a market maker means we do not take long-term positions, mitigating potential risk exposure.

Meanwhile, our Asset Management division has integrated responsible investment practices into our investment process to aid us in creating long-term value for clients and beneficiaries. The practices include explicitly considering and integrating the impact of material environmental, social and governance factors on the long-term financial risk and return of our investments. Our Asset Management division is a signatory to the Principles for Responsible Investment and has been accepted as a signatory to the Financial Reporting Council's Stewardship Code for the third year running, illustrating our commitment to strong stewardship of our clients' capital.

The product offering for clients who wish to further align their investments to their values continues to grow; we offer ethical screening, sustainable funds and our socially responsible investment service. Following its commitment to NZAM in 2022, our Asset Management division set out its climate strategy and ESG risk management in June 2024 when it published its inaugural TCFD disclosures.

Over the longer term, increased reputational risk could crystallise, primarily driven by failure to address transitional impacts such as changes to regulation, technological advancement and the evolution of customer preferences. We will continue to assess the climate impacts across the whole spectrum of principal risks to ensure we meet the expectations of our people, customers, clients, investors, shareholders, regulators and other key stakeholder partners.

Metrics and targets

Our climate strategy, led by our commitment through the NZBA, spans both our operational emissions as well as the emissions related to our lending and investment portfolios. Set out in this section are our targets, measurement and reduction of our operational emissions on pages 42 to 44, followed by our assessment and ambitions for our financed emissions on pages 44 to 45.

Operational Emissions

Our approach to developing our carbon reduction plan to achieve these net zero targets is set out in our strategy section on pages 36 to 37.

Our methodology for calculating and disclosing our GHG emissions and energy use is in accordance with the requirements of the World Resources Institute GHG Protocol Corporate Standard, GHG Protocol Corporate Value Chain Accounting and the SECR standards. We report on all material Scope 1 and 2 emissions associated with our operations. Scope 1 includes fuel emissions from buildings and company vehicles and Scope 2 includes our emissions from electricity. We have also reported our indirect Scope 3 operational emissions across all categories where we have any material emissions.

For our building emissions (including our industrial processes in our Brewery Rentals sites) we have continued to develop our energy efficiency plans for our sites, working with our facilities management partner. These plans consider our 2030 net zero ambition, ensuring we make investment choices for each of our sites that lead us towards that ambitious goal. Important considerations include energy-efficient equipment, control and monitoring infrastructure, electrification solutions and renewable energy options.

We have continued to electrify our company car fleet (total of 743 cars). At the end of this financial year we have a car fleet where 53.6% of the cars are fully electric, and with 98.5% being either fully electric or plug-in hybrid.

Through this financial year, we have greatly enhanced our in-house climate data capability, allowing us to enhance our operational footprinting across all Scope 1 and 2 as well as relevant Scope 3 categories. Our climate data working group is working closely with all relevant departments internally to fully operationalise these carbon accounting processes and to allow more frequent climate-related management information to be used across the group.

Our ambitions

Become operationally

net zero

through our Scope 1 and 2 emissions by 2030

Operational Scope 1 and 2 emissions intensity		0.65	0.59	0.81	0.74
Operational Scope 1, 2 and 3 emissions intensity				10.89	14.29
Calculated using: Average number of employees in year		3,994	4,060	3,994	4,060

1. We have reported on all emission sources required under the Companies (Directors' Report) and Limited Liability Partnerships (Energy and Carbon Report) Regulations 2018. Our reporting year runs from August 2023 to July 2024. The emissions reporting boundary is defined as all entities and facilities either owned or under our operational control.
2. Emissions have been calculated using the Greenhouse Gas Protocol Corporate Standard and cover all greenhouse gases (converted to tCO₂e). We have used emissions factors published by the UK government's Department for Business, Energy & Industrial Strategy, and the International Energy Agency.
3. During the year-end carbon accounting process we identified some adjustments needed to our 2023 comparable Scope 1, 2 and 3 emissions. The 2023 Scope 1, 2 and 3 emissions above have been restated to ensure consistency with this year's disclosed emissions methodologies as well as to address some issues with the quality of the data collected last year for 2023.
4. These reported emissions have not been audited by a third party.

Our ongoing approach across our operations of energy efficiency and sourcing of renewable energy continues to drive down our Scope 1 and 2 emissions. We have now achieved a reduction of 41.6% in our Scope 1 and 2 emissions since 2019 under a market-based approach, which demonstrates good progress towards becoming operationally net zero by 2030.

In the 2024 financial year, our total Scope 1 and 2 location-based GHG emissions were 3,226 tonnes of carbon dioxide equivalent (tCO₂e), equating to 0.81 tCO₂e per employee, up 6.7% overall and up by 8.6% per employee from 2023. This increase is primarily due to increased activity in our transport fleets, covering both our car fleet and our commercial vehicles in our Brewery Rentals business.

Throughout the 2024 financial year, our premises have continued to source renewable energy wherever under our control. This has helped our market-based building emissions to track 48% lower than our location-based building emissions at just 707 tCO₂e.

The continued challenge of rising energy prices and our strategic journey towards a net zero portfolio of premises has increased the focus on responsibly reducing our energy consumption. Across the 2024 financial year, energy audits have been completed within larger premises and are being used to develop our carbon reduction roadmap out to 2030. During the past year, our energy efficiency programme has implemented a number of energy-saving initiatives across our office estate, including:

- Disposal of our oversized Brighton office with a move to a premises 50% smaller. This office is a modern, sustainable build achieving BREEAM Excellent rating with solar photovoltaic and low energy heating, ventilation and air-conditioning (“HVAC”) systems. We anticipate a reduction of emissions for this business by 60%.
- Full building modernisation and decarbonisation of our Dundonald office. This has seen the removal of gas from the property, substantial insulation improvements and upgrade of our HVAC systems to fully electric heat pump solutions. All lighting has been replaced with modern LED. We expect to see an energy reduction of 40% for this property.
- Replacement of the 10 Crown Place building management system has enabled us to control our building services closer, monitor consumption in more detail and identify peaks in energy consumption for action.

Financed Emissions – Banking

The greatest opportunity we have to support reductions in greenhouse gas emissions is by working with our customers on their transition to a low carbon economy – helping them to adopt energy-efficient and low carbon technologies. To measure our progress requires us to measure the attributable emissions of the assets and businesses in our loan book, enabling us to meet our targets and ambitions within our climate strategy.

Over the past three years we have developed our financed emissions, improving our data quality and data availability. Set out below is our assessment of financed emissions relating to our loan book at 31 July 2024 and our initial assessment of investee emissions relating to the activities of our Asset Management division (at 31 July 2023).

Financed emissions in our Banking activities

In the past year, working alongside our peers in PCAF, we have continued to improve our methodologies in assessing our financed emissions – combining our own loan book data with a number of external data sources, providing a more accurate assessment of these emissions, especially across our carbon-intensive sector of transport.

In our assessment of our loan book this year, we have used the PCAF methodologies, applying their latest guidance from their Financed Emissions Standard 2nd edition, and drawing on three of their developed methodologies: business loans, project financing and motor vehicle loans. On review, 94.6% of our loan book is in scope of GHG assessment under the current PCAF standard. Of this, 56.1% has been assessed under the business loans methodology, and we have apportioned an amount of emissions from these businesses which is in line with the value we finance. A further 2.7% of our total loan book has been assessed under the project finance methodology. Here, we have accounted for the apportioned emissions of the project due to our contribution. The final 35.8% of our loan book has been assessed using the motor vehicle loans methodology, and covers the annual in-use emissions of the vehicles that we finance.

Our financed impacts – Banking^{2,4}

Financed emissions in loan book – bank	PCAF methodology	Proportion of loan book	Financed emissions ^{1,2} tCO ₂ e	PCAF data quality score (1-high, 5-low)	Economic emissions intensity ktCO ₂ e/£m
Scope 3 (category 15 – loan book only)					
	Motor vehicle loans	35.8%	595,124	2.8	0.17
	Business loans	56.1%	326,655	5.0	0.06
	Project finance	2.7%	242,849	5.0	0.91
	Not assessed/out of scope ³	5.4%	n/a	n/a	n/a
Scope 3 (category 13 – downstream leased assets)					
	Relating to vehicle hire		270,948	1.0	
Total emissions			1,435,576		

1. Currently, our financed emissions calculations only include the customer or asset’s Scope 1 and 2 emissions. In the future, we will consider the wider emissions related to financed assets and businesses. Initial sectors are likely to include (i) motor vehicles (upstream embedded emissions of manufacture) and (ii) property construction finance (embedded emissions from materials and in-use emissions of housing).
2. PCAF data quality score in our first assessment in 2022 was around 5. We have made significant improvements to our data sourcing from both internal systems and third-party sources. In particular, for motor vehicles, we have sourced vehicle-specific emissions and actual mileage from UK government agencies.
3. A small proportion of our loan book has not been assessed this year (or is out of scope) due to lack of market-agreed carbon accounting methodologies. We continue to work with PCAF and other banks to consider these areas.
4. These reported emissions have not been audited by a third party.

In March 2024 we published our initial sector-based intermediate 2030 emissions reduction ambitions, covering cars and vans. To align our ambition to a credible scenario, and as the vehicles we finance are predominantly in the UK, we chose the UK Climate Change Committee's Balanced Net Zero Pathway ("CCC BNZP") from the Sixth Carbon Budget.

The average emission intensities of both cars and LCVs in our loan book in 2023 are lower than the CCC BNZP.

The average emission intensity (gCO₂e/km) for cars in our loan book in 2023 is 130 gCO₂e/km. This would need to reduce by 41% to reach an average of 76 gCO₂e/km by 2030 to align with the CCC BNZP.

The average emission intensity (gCO₂e/km) for LCVs in our loan book in 2023 is 190 gCO₂e/km. This would need to reduce by 39% to reach an average of 116 gCO₂e/km by 2030 to align with the CCC BNZP.

Our ambitions

To reach net zero emissions

by 2050

across attributable GHG emissions from our lending and investment portfolios.

Provide over

£1 billion

of lending for zero emission battery electric vehicles over the five-year period 2023 to 2027.

Intermediate 2030 Sector Ambition (surface transport)

Sector	Baseline 2023 – financed emissions			Intermediate ambition 2030	
	Emission intensity gCO ₂ e/km	Total financed emissions ktCO ₂ e	PCAF score	Sector ambition	Emission intensity aligned to CCC-BNZP gCO ₂ e/km
Cars	130	263	1.9	Reduction in the average emission intensity of cars by 41% by 2030	76
LCVs	190	157	2.1	Reduction in the average emission intensity of cars by 39% by 2030	116

Financed Emissions in our Asset Management Activities

In 2023, our Asset Management division made its inaugural climate target disclosure to the NZAM initiative. The disclosure was based on the Net Zero Investment Framework. 18% of the division's AuM was initially committed to its climate targets. The targets disclosed were:

- **Portfolio coverage target** – 100% of AuM in material sectors will be considered net zero, aligned or aligning by 2050.
- **Portfolio decarbonisation reference** – target weighted average carbon intensity 50% below relevant benchmarks for each portfolio by 2030 from a 2019 baseline.
- **Engagement threshold target** – by 2025, 70% of financed emissions (Scopes 1 and 2) are either aligned to a net zero pathway or subject to direct or collective engagement and stewardship actions.

Our financed impacts: Asset Management

Other emissions related to investments – Asset Management		Proportion of investments	Financed emissions tCO ₂ e	Scopes	Economic emissions intensity tCO ₂ e/£m
Scope 3 (category 15 – investments only)	Listed equity and corporate bonds	99%	410,754	1 and 2	59
		99%	3,916,763	1,2 and 3	563

Sustainability and climate governance

The Integration of Climate into our Governance Structure

The group has an established governance framework into which climate has been integrated. This ensures effective oversight and delivery of our sustainability and climate strategy, as well as climate risk.

As our climate risk framework matures and becomes further embedded, during the year we have further refined our governance structure to manage an integrated approach to both climate risks and opportunities.

Oversight of climate-related risks and opportunities continues to be supported by the establishment of clear roles and responsibilities, extending across board and executive committees, and the three lines of defence more generally. Integral to this is the provision of regular framework status updates to appropriate committees and forums.

Reporting and management information are provided to relevant committees, providing important insights to enable climate considerations to be embedded within both strategic planning and the setting of group-level risk appetites. An established link exists between the delivery of the group’s climate strategy and executive remuneration through the inclusion of climate/ESG objectives within both the Executive Committee’s scorecard and Long Term Incentive Plan.

Board Oversight

Board

The board is responsible for the long-term success of the group and the delivery of sustainable value to its shareholders and wider stakeholders. It discharges some of its responsibilities directly and others through its subsidiary committees.

In ensuring the long-term sustainability of the group, the board is also responsible for the overall delivery of the firm’s climate and ESG strategy. It reviews and approves the strategy and receives regular updates on its execution from relevant members of the executive team. The board is also responsible for approving the group’s risk appetite statements, including risk appetites associated with climate risk.

Board Risk Committee

Operating on authority delegated by the board, the Board Risk Committee (“BRC”) oversees the management of risk across the group, including the risks presented by climate change.

The BRC provides oversight of the measures taken to manage climate risk and receives regular updates on the development and subsequent embedding of the firm's climate risk framework. This includes the ongoing review of emerging portfolio management information, monitoring the evolution of associated risk appetites and the consideration of climate-related risks and opportunities via scenario analysis exercises.

Audit Committee

Operating on authority delegated by the board, the Audit Committee oversees the management of financial and regulatory reporting across the group, as well as the firm's internal financial controls. The committee is responsible for ensuring the clarity and completeness of environmental and sustainability disclosures and climate commitments included within the group's Annual Report.

Nomination and Governance Committee

The Nomination and Governance Committee monitors environmental, social and governance ("ESG") and sustainability developments relevant to the group (including developments relating to climate change).

The role of management

The chief executive has ultimate responsibility for climate-related issues affecting the group and its customers and overall accountability to the board and shareholders for ensuring sustainable and responsible practices, including those associated with the environment. Accountability for the group's climate and ESG strategy similarly rests with the chief executive, albeit with various responsibilities delegated to members of the executive team as appropriate to ensure strategic delivery and embedment within ways of working.

Within the Banking division, and in line with expectations under the Senior Managers Regime, the group chief risk officer ("GCRO") is specifically responsible for climate risk management. This includes:

- embedding climate change risks within business planning and risk appetite statements;
- conducting scenario analysis over different time horizons;
- ensuring sufficient board-level visibility and a clear allocation of roles/responsibilities; and
- considering risk materiality as part of the annual Internal Capital Adequacy Assessment Process ("ICAAP").

The GCRO is supported by the board and the executive team who collectively oversee delivery of the firm's climate risk objectives and are also responsible for challenging and approving the firm's broader climate and ESG strategy.

Executive Committee

The Executive Committee evaluates and implements initiatives to ensure a sustainable business model that considers all risks and opportunities, including ESG and climate.

Group Climate Committee

The Group Climate Committee oversees the development of the group's climate strategy, including the advancement of climate ambitions, and associated operational and financing activities, targets and metrics. It supports the group chief executive and Executive Committee in their recommendations to the board for approval.

The Group Climate Committee is supported by five working groups focused on the different aspects of the group's climate strategy, each with its own Executive Committee sponsor.

Working group	Executive Committee sponsor
Commercial green growth	Divisional chief executive officer
Operational climate impacts (including supply chain emissions)	Group chief operating officer
Climate strategy of the group's Asset Management business	Asset Management chief executive
Climate risk	Group chief risk officer
Climate targets and reporting	Group finance director

Group Risk and Compliance Committee

At an executive level, climate risk management is primarily overseen by the Group Risk and Compliance Committee ("GRCC"), which is responsible for reviewing and challenging the risk framework employed to manage the financial risks from climate change. To support this, regular framework updates are presented to the committee with relevant climate risk MI also embedded within its long-established risk reporting mechanisms.

Credit Risk Management Committee

The Credit Risk Management Committee ("CRMC") is specifically responsible for monitoring the group's credit risk profile. Accordingly, it is responsible for overseeing the management of climate-related credit risk considerations.

Over the last year it has received regular updates on the embedded Banking division's credit risk assessment framework, as well as the initial MI reporting stemming from this, designed to illustrate the potential climate risk sensitivity of different sectors and asset classes.

The committee has also periodically reviewed and approved the integration of climate considerations within credit risk policies and standards.

Training and competency

Both the board and executive team are committed to building and embedding a requisite skill set across climate and ESG competencies. The regular updates provided to the board and management committees over the course of the last year have played a key role in this regard, helping to educate key populations on the risks and opportunities that climate change presents, as well as the firm's progress in addressing these. This year, the board received training sessions on (i) updates on sustainability reporting and disclosures, and (ii) insights on the evolution of the UK energy mix and electrification of road transport.

To support awareness more broadly across the organisation, a new mandatory training module was issued to all UK-based staff across the group during the year to support the development of a core level of understanding of climate risk considerations. Tailored updates on the group's sustainability and climate strategies were delivered to relevant business and function-specific forums.

Going forward, additional capability and expertise will be enabled through further training of our people, including the undertaking of accredited climate qualifications where relevant. This year, our climate data manager completed the new PCAF academy's learning programme for PCAF signatories to deepen their knowledge of the application of the PCAF standards and elevate their understanding of financed emission accounting.

Our policies

We are committed to acting responsibly through all our ways of working, and have a number of group-wide policies and procedures in place to ensure we continue to operate in a socially responsible and compliant manner.

Dignity at Work Policy

Our Dignity at Work Policy outlines the type of behaviour that the company considers to be unacceptable and explains what solutions there are if any employee has experienced or believes someone else has experienced any discrimination, harassment or bullying at work.

We ensure equal opportunities for all, including having a commitment as part of our Dignity at Work Policy to ensure no employee is subject to discrimination. This applies to all work contexts, as well as all employee life cycle events, for example in recruitment, training, promotion and flexible working requests.

Additionally, our people with disabilities are encouraged to share their impairment with us, to ensure any reasonable adjustments can be made. We are also members of the Business Disability Forum to support our inclusive approach to hiring, retention, training, career development and promotion of employees with disabilities.

Whistleblowing Policy

We provide a simple, transparent and secure environment for our employees, shareholders and other stakeholders to raise concerns about any potential wrongdoing within the company.

We encourage our employees to report any activity that may constitute a violation of laws, regulations or internal policy, and reporting channels are provided to staff for this purpose within the framework of a Whistleblowing Policy.

Employee Health and Safety Policy

Our Health and Safety Policy demonstrates our commitment to ensuring our employees and visitors are safe and sets the framework for our safety culture. We continue to provide a safe and healthy working environment for our employees and visitors in accordance with the Health and Safety at Work etc. Act 1974 and the Management of Health and Safety at Work Regulations 1999.

The Health and Safety Committee continues to meet on a quarterly basis and we are proud of the ongoing progress in successfully raising the profile of health and safety across the business. This year we recorded 67 incidents across all of our sites. Of these, two were reportable under the Reporting of Injuries, Diseases and Dangerous Occurrences Regulations 2013. We continue to use an online risk assessment tool to manage site-specific risks as appropriate and our Display Screen Equipment risk assessment programme. We also carry out annual audits of all premises and monitor findings through a live dashboard.

Privacy Policy

Our Privacy Policy codifies our approach to protecting personal information, in line with the General Data Protection Regulation and UK Data Protection Act 2018. It sets out our core principles for what personal information we collect and process, and the controls to which the data is subject through its life cycle.

We have a nominated Data Protection Officer who is accountable for the firm's approach to privacy management, a Chief Information Security Officer accountable for our approach to cyber security, and a broader operating model in which the privacy and security requirements are embedded in operations throughout the organisation.

Financial Crime Policy

Our policies and standards are intended to prevent the group, employees, clients and any other associations or representatives from being used for the purposes of financial crime, including, but not limited to, money laundering, terrorist financing, facilitation of tax evasion and circumvention of financial sanctions.

We are committed to carrying out business fairly, honestly and openly, operating a zero-tolerance approach to bribery and corruption. We are dedicated to ensuring full compliance with all applicable anti-bribery and corruption laws and regulations, including the UK Bribery Act 2010.

Human Rights and Modern Slavery Act

The board gives due regard to human rights considerations, as defined under the European Convention on Human Rights and the UK Human Rights Act 1998. We are aware of our responsibilities and obligations under the Modern Slavery Act, with the appropriate policies and training in place to enable compliance across the organisation.

The Banking division has also committed to the CIPS Ethical Code of Conduct, which supports our commitment to preventing modern slavery from existing within our supply chain. Further details of our compliance with the Modern Slavery Act can be found on our group website.

Tax Strategy

We are committed to complying with our tax obligations and doing so in a manner consistent with the spirit as well as the letter of tax laws. This includes a transparent and cooperative relationship with the tax authorities. Our tax obligations arise mainly in the UK where our operations and customers are predominantly based. Our straightforward business model reduces the complexity of our tax affairs and helps us maintain a lower risk tax profile. Further details of our approach to tax can be found on our website.

Our people

Valuing our People

We are committed to creating an environment where our colleagues feel motivated, proud to work for us and can reach their full potential. A key enabler for our overall business success is our inclusive culture. We are proud to create an environment where colleagues can thrive and, in turn, deliver excellent outcomes for our customers, clients and partners.

The “Close Brothers Way” Code of Conduct sets out the values and behaviours we expect from our people. Our culture is defined through our cultural attributes. These are displayed by our senior leadership teams, setting the tone from the top by which we operate. We continue to run inclusive leadership training sessions for our managers, senior managers and group executives, highlighting how actions and behaviours can shape our inclusive culture.

We are signatories to a wide range of charters and commitments across a broad spectrum of inclusion themes, including: the Women in Finance Charter, Race at Work Charter, The Valuable 500, Mental Health at Work Commitment, Disability Confident Employer Scheme, and the Armed Forces Covenant. We partner with leading organisations and participate in wider membership bodies, including Stonewall, the Business Disability Forum, Hidden Disabilities and the Diversity Project, to help inform our thinking and subsequent actions.

We are committed to attracting, developing and retaining the best talent, and we actively seek diversity – it applies to all of us and goes beyond visible or demographic characteristics. It includes diversity of thought, working styles, skills and experience. We continue to champion inclusive recruitment practices and aim to attract a diverse group of candidates for every open job role. We guide hiring managers in writing inclusive job descriptions, for example the importance of using non-gendered language.

We have also removed unnecessary criteria from our recruitment processes. We aim for balanced shortlists when recruiting both directly and through our partner agencies. We also ensure our interview panels are diverse and gender-balanced where possible. Hiring managers attend our “Licence to Recruit” training where we educate them about biases that can impact interviews and how to manage them. We aim to promote flexibility through offering positions as full time, part time or job share opportunities where possible.

Portraying a genuine, authentic view of our culture externally has been a real focus this year. We launched our Employee Brand Ambassador programme with over 30 delegates from across the bank attending a series of sessions over a six-month period. The aim of the programme was to promote and enhance our employer brand, generating positive awareness and engagement, and encouraging others to do the same.

We are proud of the enthusiasm, passion and hard work of our eight executive-sponsored group-wide employee inclusion networks, three working groups and multiple local D&I forums. These include our newly launched Veterans Network, which has received a bronze award from the Defence Employer Recognition Scheme. Ongoing collaboration across our networks helps create a deeper level of understanding and supporting our commitment to intersectionality.

We celebrate National Inclusion Week group-wide, as well as culture weeks locally in our business areas. Our employee networks, groups and forums further deliver excellent sessions and employee engagement opportunities throughout the year. Examples include Black History Month, Social Mobility Day, Mental Health Awareness Week, book and film clubs and bring your child to work days.

Our Diversity and Inclusion Strategy

In May 2024, we launched our new Group Diversity and Inclusion Strategy. Despite our best efforts across the group, disappointingly we have not progressed towards meeting our 2025 representation targets. The introduction of our new Group Diversity and Inclusion Strategy outlines our priorities and focus areas for the next three years.

The market for diverse talent remains competitive, with most firms seeking to improve their representation. By outlining our strategy and action plan, we will ensure we are well positioned against our competitors and prepared for a changing regulatory landscape for diversity and inclusion.

Our primary focus is to attract and recruit more diverse talent, and to support colleagues throughout their careers. We actively seek diversity and it is critical that we continue to promote inclusive behaviours, respect and teamwork, to help us maintain our inclusive culture.

Our second aim is to maintain an environment in which all colleagues feel psychologically safe and provide targeted support for minority groups in particular.

Finally, we take pride in helping small businesses and individuals, through creating jobs and opportunities in local communities across all our regions, and we take care to ensure that environmental and social factors are considered in the decisions we make as a business. That is why our third diversity and inclusion focus area is to embed inclusion in our interactions with external partners.

In support of our Group Diversity and Inclusion Strategy, we launched our new Transgender Inclusion Policy, and also shared improvements to our family-friendly benefits, including:

- Increasing our maternity leave and adoption leave offering from 18 to 22 weeks' full pay.
- Providing up to two weeks' paid time off for fertility treatment and recovery (applicable to both partners).
- Offering two weeks' paid time off for all forms of pregnancy loss (applicable to both partners).

Gender diversity

	31 July 2024	
	Male	Female
Number of board directors ¹	5	4
Number of subsidiary directors ²	48	9
Number of senior managers other than board directors ³	218	105
Number of employees other than board directors and senior employees	1,918	1,724
Total	2,189	1,842

1. Includes non-executive directors, excluded from group headcount calculations.
2. Includes subsidiary directors who are excluded from group headcount calculations.
3. Senior managers are defined as those managers with the line management responsibility for a line manager, in accordance with the representation shared in our gender pay gap report. They are generally heads of departments, functions of larger teams. This figure excludes 40 male and 9 female employees who are reported under directors or directors of subsidiaries.

Neurodiversity pillar launch

This year we launched a neurodiversity pillar within our Accessibility network. The group has run a number of neurodiversity roundtables in multiple offices, and also led a successful Neurodiversity Celebration Week which received high levels of engagement with 3,500 views of related posts on our company intranet in just one week.

Engagement

Listening to the views of our colleagues is essential to drive and maintain employee engagement, ensuring our culture is one where everyone feels like they belong, can thrive and is proud to work for us.

This year, we ran a group-wide pulse survey to monitor overall engagement alongside colleague sentiment around inclusion, speaking up and treating customers and clients fairly. Our FY 2024 employee opinion scores remained closely aligned to last year with overall engagement at 83% (FY 2023: 86%). Introducing a new question around speaking up, we were particularly pleased that 92% of colleagues feel comfortable to contribute to meetings.

In addition to our group-wide survey this year, we have focused on introducing more continual employee listening through gathering data at different stages of the employee life cycle. Our employee experience team engages directly with colleagues at the point of joining, returning from parental leave and when celebrating work anniversaries. Colleagues are asked to complete short surveys to share their views on company culture and their personal experience of working at Close Brothers, with 'inclusive' and 'friendly' being the most commonly used words to describe our culture.

Supporting our People

All employees have access to our 24/7 Employee Assistance Programme, mental health first aiders and the Thrive app that offers techniques for meditation and cognitive behavioural therapy. Employees can also book one additional day a year off to focus on their mental health and wellbeing. Our Wellbeing network further supports us with education and awareness raising initiatives.

Our benefits are regularly reviewed and publicised. We support everyday flexible working – empowering colleagues to achieve an optimal work/life balance. We are seeking to enhance Close Brothers' reputation as a family-friendly workplace through the provision of benefits such as emergency care cover. In response to feedback from colleagues, this year we have expanded our private medical plan to include menopause cover. We have an active menopause colleague working group and in July 2024, we were nominated as a finalist in the Menopause Friendly Employer Awards for "Most Open Culture" and "Best Peer-to-Peer Support" categories.

The group continues to pay all staff at or above the national living wage. For members of the group's pension plans, we contribute between 6% and 10% towards colleagues' pensions, which is above required levels. We offer both a Save As You Earn scheme as well as a Buy As You Earn share incentive plan, which allow employees to acquire shares on a monthly basis out of pre-tax earnings.

Gender diversity awards

The "Women in Motor" group within Close Brothers Motor Finance had two of its members nominated as "Advocate of the Year" at the "Women in Credit Awards". This is in recognition of their efforts to champion incredible women and those who empower them across the entire credit and financial services industry. Close Brothers Asset Management was also highly commended for "Contribution to Gender Diversity" at the "Women in Financial Advice Awards 2023" with one of our colleagues winning the Award for Financial Adviser of the Year for the Northwest.

Participation rates in our long-term ownership schemes remain strong at 46% of all permanent and fixed term employees who are eligible.

Development Programmes

We run two internship programmes in partnership with 10,000 Interns Foundation and upReach. These aim to increase social mobility, accessibility and ethnic diversity in our industry and organisation. We are building inclusion through mutual mentoring where currently we are matching members of our senior leadership team with junior colleagues in some business areas. Externally, we partner with Moving Ahead on mentorship programmes for women and all under-represented groups.

Over the past nine years the Close Brothers SME Apprentice Programme has helped to fund 110 apprenticeships by partnering with the AMRC Training Centre, Make UK, the Manufacturing Technologies Association and the Road Haulage Association. As part of our responsibility to help address the social and economic challenges facing businesses today, the programme helps SMEs to fill skills gaps, develop their future workforce and improve long-term growth prospects, while providing a vital opportunity to invest in local talent.

Developing our People

We provide a full range of training and development for our people irrespective of where they are in their careers. We work with our colleagues from induction through to management, leadership, talent development programmes and supporting professional development qualifications as well as utilising the apprenticeship levy where appropriate.

Our workforce remains diverse, with 46% (2023: 45%) female employees, and we have a broad age range of employees, with 21% (2023: 22%) of our employees being under 30 years old and 22% (2023: 21%) over 50.

All colleagues have access to our learning portal where they can access a broad range of learning offerings including practical tools and e-learning modules on a wide variety of topics. The average number of training hours across the group was 16 per employee during the year, reflecting an increase in regulatory modules and delivering more training online to make it more accessible.

We require all employees to complete relevant regulatory training on an annual basis with further training offered when required. This year, we achieved 100% completion rate of mandatory training by the last working day of the financial year.

We continue to run open application processes for cross-company mentoring schemes that are delivered in partnership with Moving Ahead; these include both Mission Include (supporting those who identify as being from a minority background) and Gender Equity (with a focus on supporting females in progressing to senior roles).

The formal development of our talent pipeline remains a key focus. We continue to support our entry-level programmes through our school leaver programme, Aspire, as our current first year cohort move into their second year rotations and those completing the programme are supported to find permanent roles across the group. This two-year scheme offers placements in two business areas within our Banking division, where individuals rotate around client-facing and front office teams whilst also having the opportunity to gain an apprenticeship qualification. Upon completion, we offer the option for Aspire trainees to complete apprenticeship qualifications should they wish to do so. We also have our 2022 graduate cohort rolling off the scheme this year to fill entry-level roles across the group.

To support our high potential colleagues, our FY 2024 emerging leaders programme saw 19 individuals across the group taking part. 16% of the cohort received a promotion either during or following completion of the programme.

To support our inclusive culture through further embedding our code of conduct, we continue to ensure all our new starters receive our "Close Brothers Way" e-learning module, focusing on our cultural attributes and expected behaviours. This year, we will be working with members of our employee inclusion networks to further update the content for further rollout in 2025 to all colleagues.

Employees in the Community

Creating long-term, lasting value in the communities where we operate, remains a key priority for the group. We understand that volunteers are often the driving force behind many community and charity activities and we are committed to supporting our employees to get involved in these wherever possible.

As part of the relationships we have with our charity partners, we encourage employee engagement through involvement in the volunteering initiatives offered. For every hour of volunteered time, we donate £13.15 directly to the charity under our Matched Giving Scheme, and we also encourage people to take advantage of one paid volunteering day each year through our Employee Volunteering Policy.

In FY 2024, over 350 colleagues made use of their volunteering day and a number of teams chose to use their days to make a positive environmental impact.

Our partnership with the children's literacy charity, Bookmark, continues and in May 2024 we reached the milestone of being the first corporate volunteering partner to deliver over 1,000 reading sessions for the charity.

Our colleagues have also volunteered with our other corporate charities including carrying out "Wild at Work" days with The Wildlife Trusts.

Charity

Our two main corporate charity partners are chosen by our colleagues as part of our employee opinion survey and these remain Make-A-Wish Foundation, who grant wishes for children with life-threatening illnesses, and Cancer Research UK, which we have now supported for 11 consecutive years. To date, we are delighted to have raised over £630,000 for Cancer Research UK as well as donating clothing and items to be sold across their 600 shops, nationwide.

Over the last five years, we have raised over £270,000 for Make-A-Wish Foundation, enabling them to grant over 135 magical wishes for critically ill children and their families.

We have a dedicated committee for charitable and community activities chaired by our group head of human resources and supported by employees from across the group. This committee meets regularly to discuss and propose new initiatives with input from our control functions when required. We also have several local committees which plan and run initiatives to raise funds for local charities.

Alongside our group-wide charity week in May, we also ran many other events throughout the year to raise funds for other charitable causes. We supported "Bring your dog to work day" raising money for Dogs for Good and we ran a Christmas jumper day to raise money for Save the Children.

Several of our employee-led networks have encouraged charitable giving alongside their events, with our Unity Network raising money for the Terrance Higgins Trust, our Accessibility network celebrating World Sight Day and raising money for Guide Dogs and our R.E.A.C.H. Network raising money for Sistah Space during Black History Month.

We also had over 80 colleagues sign up to donate blood as part of an annual campaign, raising over £850 for the NHS Blood and Transplant Charity Fund through Close Brothers donating an amount for every colleague who signed up.

We match 50% of funds that our colleagues raise for charities under the Close Brothers Matched Giving Scheme. We also encourage our employees to collaborate on raising money for causes that are most meaningful to them by matching funds raised through locally organised fundraising events and activities.

This year we have continued to support additional charities that align with our ESG goals, donating a total of £100,000 to Stop Hate UK, The Wildlife Trusts, Smart Works and Bookmark. In response to the conflict in Israel and Palestine, the devastating flooding in Libya, the earthquake in Morocco and the earthquake in Afghanistan, we have donated over £11,000 to date, including matching 100% of colleague donations, to the British Red Cross in support of their politically neutral Disaster Fund.

Our Payroll Giving Scheme matches charitable contributions while allowing employee donations to be made directly from pre-tax salary. After 13 years of receiving the Payroll Giving Quality Mark Gold Award, this year we have been given a Platinum award in recognition of our overall engagement in the scheme.

Our customer commitment

The needs and expectations of our customers, clients and partners are accelerating. At Close Brothers we continue to evolve to meet these needs and expectations whilst ensuring fairness and good outcomes.

Our customer principles keep the customer at the heart of all we do: we do the right thing for customers, clients and partners; we are flexible, responsive and execute with speed; we make decisions informed by our specialist expertise; and we build relationships based on quality and trust.

This is supported by our Customer Commitment Framework which sets out how we want our customers and our colleagues to feel: valued, happy, understood, confident, and that it is easy to do business with us.

This commitment embeds our customer-centric approach across the group and helps us to “walk in the shoes of customers”, designing and delivering products, services and experiences for our customers, gaining their loyalty.

In Savings, in-person training has been delivered to all front-line colleagues to embed the Customer Commitment Framework into day-to-day tasks, using interactive scenario-based exercises to promote good customer outcomes and maintain customer loyalty. Colleagues can identify and relate to the desired customer experience, whilst learning how to better tailor the delivery of this experience. We measure the success of this through customer experience metrics and analyse what’s working well to support development of future customer-first initiatives.

Voice of the Customer

Close Brothers continues to invest in strengthening its capability around customer experience measurement so that we listen, learn and act. We have been running our customer forums for over 10 years and in that time we have been developing our capabilities and governance to bring the voice of the customer into our day-to-day decision-making processes, which remains a key priority for Close Brothers.

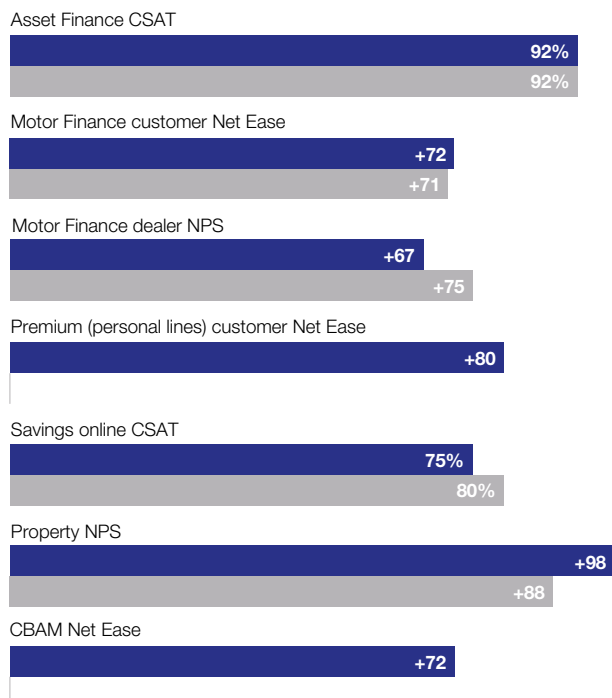

Delivering excellent client experiences and outcomes is at the heart of our business. To ensure Close Brothers Asset Management continues to provide outstanding services to our clients now and in the future, we have undertaken research to better understand the evolving needs and expectations of our clients. Using this insight, we have worked with c.70 colleagues to document over 500 features in a Service Design Blueprint that defines the future state experience we will strive to deliver to meet client needs.

At Close Brothers, we have dedicated forums for complaints and vulnerable customers. At a group level, we use these forums to share best practice, collaborate and innovate on opportunities to enhance the customer experience. We have extended our “language line” to support Motor Finance customers. This functionality, which is already available in Premium Finance, is designed for customers where English is not their first language. Changes have been made so that we can identify vulnerable customers through automated processes and additional training is provided to contact centre colleagues.

We continue to monitor customer sentiment across each of our business areas by gathering feedback regularly. We are pleased with the strong responses from across our diverse customer groups and our customer forums will continue to review and act on customer sentiment.

Customer Sentiment Scores

■ 2024 ■ 2023

There are four key pillars to our Customer Commitment:

Communication and Learning

Developing and strengthening the customer experience skills within our teams, and continually demonstrating how the Customer Commitment supports our purpose to help the people and businesses of Britain thrive over the long term.

Rewards and Recognition

Our colleagues drive our success and delivering good customer experience is embedded within their objectives to help support this.

Metrics

Evolving our customer metrics to better identify where and how we can enhance our customers’ experience and earn their brand loyalty.

Governance

Anchoring the voice of the customer within the heart of our structures, critical decisions and forums to ensure we listen, act, and learn to continue to deliver for our customers.

Focusing on Continuously Improving the Customer Experience

Across the group we are focused on continuous improvement, supported by colleagues in each business as well as our central Operational Excellence team.

By expanding the reach of our Lean Academy, we've purposely enabled a culture of continuous improvement so that opportunities to improve the customer experience are identified and delivered. Our Operational Excellence team diagnose where service can be improved and efficiencies generated. They work closely with subject matter experts in each area to balance process and colleague benefits with enhanced customer, client and partner experiences.

This approach to continuous improvement shows how we are delivering on our customer principles.

- **Motor Finance:** The Customer Support team saw a 31% improvement in speed of answering calls by enhanced standardisation of processes, automation of appropriate tasks, and optimising how customers are routed through the phone line. We're now helping our customers faster when they need us most.
- **Premium Finance:** Streamlining commercial large deal underwriting delivered a 36% reduction in credit decision time for large credit applications, whilst maintaining appropriate risk appetite and prudence. The broker experience has been improved by streamlining processes, improving data quality and creating a workflow system across sales and underwriting, further strengthening our long-term strategic relationships.
- **Property Finance:** We have created an automated workflow that runs monthly to summarise all transactions across a customer's live accounts, saving their accounting team time and effort consolidating the same information manually.
- **Asset Management:** Operations have launched a new "Simply Better" initiative that provides colleagues with the opportunity to raise and implement continuous improvement ideas that enhance the customer experience. In the last 12 months, Operations colleagues have implemented 122 ideas, removed 108 pain points and delivered 15 additional benefits.

The Way Ahead

- Looking forward, we are committed to continuously improving our ability to capture, consolidate and act upon customer, client and partner sentiment across all end-to-end journeys that will help us to deliver a differentiated experience and earn customer loyalty.
- We recognise the challenging macroeconomic environment facing our customers, clients and partners, and will continue to support them through high standards of service, strong relationships and our recognised expertise.
- We regularly measure and track customer performance via several key customer metrics and will continue to enhance these metrics so that we deliver good customer experience and outcomes.

Property Finance: Supporting zero-carbon homes

Citu are an award-winning, sustainable, urban property developer, who use a modular approach to construction, which uses less energy and is more cost effective for the consumer. Citu creates amazing spaces with thoughtful and innovative design and technology, using low embodied carbon materials.

Property Finance are providing a revolving credit facility for a scheme of 51 zero-carbon homes in Stall, Leeds, which are being built to passive house standards in Citu's factory which is located near to the site.

Premium Finance: Pioneering data analytics

Foresight is our innovative data enrichment product giving brokers insight about customer cancellation risk at point of quote. Our models are built on large data sets and use advanced machine learning techniques resulting in accurate predictions. This enhances our long-term relationships with brokers by providing unique insights so they can reduce cancellation risk and expand into new customer segments.
